I am an XAM subscriber and would benefit greatly from extended weather and traffic information broadcast from this fine service. Travelling by auto often leaves me out of range of many radio stations up and down the east coast. Finding timely weather and traffic reports is virtually impossible if one does not know the local stations that carry this information.

XAM provides a clear signal that one can depend upon.

Reject the NAB petition 04-160 and let XAM provide what is demanded and needed.
